## ABSTRACT

This paper is going to be about giving workers an opportunity to refer other workers. Some of the old literature on job referring suggests that it's a good way for networked workers to do stuff. Gray et al. found that "The Crowd is a Collaborative Network", so why not take advantage of that?

We'll try various incentive structures (no penalty/no rejection, task approval, referral commission, and referral bonus)

## ACM Classification Keywords

H.5.m. Information Interfaces and Presentation (e.g. HCI): Miscellaneous; See <http://acm.org/about/class/1998/> for the full list of ACM classifiers. This section is required.

## Author Keywords

Please don't make me pick keywords. This is like asking a teacher to give the bullet points of what a student missed in lecture.

*Sample intro. Does this sell the idea?*

## INTRODUCTION

Paste the appropriate copyright statement here. ACM now supports three different copyright statements:

- ACM copyright: ACM holds the copyright on the work. This is the historical approach.
- License: The author(s) retain copyright, but ACM receives an exclusive publication license.
- Open Access: The author(s) wish to pay for the work to be open access. The additional fee must be paid to ACM.

This text field is large enough to hold the appropriate release statement assuming it is single spaced.

Every submission will be assigned their own unique DOI string to be included here.
